

Interactive Vizamyl™ (Flutemetamol F18 Injection) reader training: Read with an expert

Dinner Symposium:

June 10 - 5:45pm-6:45pm EDT
Metro Toronto Convention Centre, room 701B

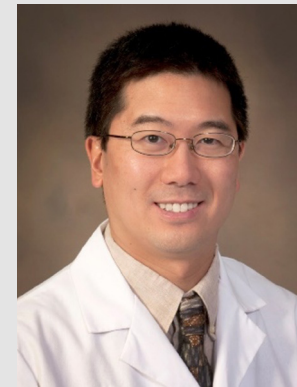

Description:

The importance of getting trained on interpreting Amyloid PET images is burgeoning as new therapies for Alzheimer's disease enter the market. GE HealthCare is pleased to provide an opportunity to master the principles of imaging with Vizamyl alongside Dr. Phillip Kuo, an expert clinician.

Upon completion of this session, you will be prepared to:

- Interpret a Vizamyl PET image
- Review clinical case studies
- Complete the Vizamyl reader training program assessment

Speaker:

Phillip Kuo, MD, PhD

Phillip Kuo, MD, is Professor of Medical Imaging, Medicine and Biomedical Engineering at the University of Arizona, where he previously served as Chief of Nuclear Medicine for 10 years. He was also the Senior Medical Director for Invicro, an imaging CRO. Scientific interests span basic, translational, and clinical research in molecular imaging across multiple modalities.
