

The intersection of AI and Molecular Imaging: Current trends and future directions

Dinner Symposium:

June 10, 2024, 5:45pm - 6:45pm EDT
Metro Toronto Convention Centre
Room 718A

Join us:

Hosted by Dr. Delphine Chen, MD from the Fred Hutch Cancer Center, this panel-style discussion will explore the impact of artificial intelligence on patient workflow management, image reconstruction, and organ segmentation and quantitation. Engage with leading experts as they discuss the transformative role of AI in shaping the future of molecular imaging.

We are excited to welcome our 2024 keynote speakers:

Facilitator

Dr. Delphine L. Chen, MD
Director of Molecular Imaging
Fred Hutchinson Cancer Center

Floris P. Jansen, PhD
Chief Scientist,
Molecular Imaging
GE HealthCare

Jon Piper
Chief Scientific Officer,
MIM Software
